

Premier Fence

Our Sportaflex **Premier Fence** is a modular, portable, lightweight fencing system designed for use on athletic and recreational playing fields.

Several optional attachments allow our portable fence panels to be used on any level surface, from natural grass to artificial turf, indoors or out. Our **Premier Fence** comes in aluminum frames at heights of 4½ ft and 6ft. The poly-vinyl mesh is available in Black, Blue or Forest Green.

* Our fence design is ideal for all sports and recreational activities, including crowd control. Optional attachments provide greater stability in soft turf, high wind conditions.

Brand your fence with our PRINTED AD BANNERS!

Advantages:

- 1. Aluminum frames designed and built to last**
- 2. Professional look - turns fields into stadiums**
- 3. Multiple Mounts depending on ground type**
- 4. Supports advertising banners**

Mounting Options

Post Anchor with plastic sleeves.
 Our post anchor has an 11 inch steel post that is quickly inserted into 18 inch plastic sleeves for easy setup and take down

Base Anchor with Lag Auger Bolts that can be drilled into the ground with a portable drill

Spring technology reduces risk of injury

Steel baseplates can be used on artificial turf

Sportaflex's **Economy Fence** also utilizes aluminum poles, rather than plastic. Although not a complete frame, the Sportaflex **Economy Fence** provides poles that won't break, while giving parks the assurance of enhanced safety for it's players.

Revolutionary spring technology means you'll NEVER replace another pole! The insert is easily replaced, instead of poles, so that injuries are less likely.

The fencing comes in rolls of 160, 100 and 50 foot rolls. Each section is supported with highly durable aluminum tubing, allowing for longer life, and a fence that stands up straight.

In addition, our tensioning system helps eliminate the 'smiley-face sag' found on similar fences. A simple zip-tie inserts through grommets and a hole in the aluminum pole, ensuring that the top edge of your fence is straight.

- Advantages:**
- 1. Aluminum poles**
 - 2. Easy to store roll-up mesh**
 - 3. Less expensive**
